1 Plaintiffs Jennifer Miranda and Patricia Terry (“Plaintiffs” or “Class Representatives”)
2 respectfully submit this memorandum in support of Plaintiffs’ Motion for Final Approval of Class
3 Action Settlement and Certification of Settlement Class.

4 I. INTRODUCTION

5 On December 17, 2020, the Court granted preliminary approval to the parties’ Settlement
6 Agreement and ordered that the Settlement Administrator execute the approved Notice Plan. Order
7 Preliminarily Approving Class Action Settlement, ECF No. 44. The success of the Notice Plan and
8 response from Class Members confirms that the Settlement is fair and reasonable and provides
9 outstanding relief to the Class.

10 As attested to in the Declaration of Brian Smitherman (“Smitherman Decl.”), the notice
11 plan established by Class Counsel reached 93% of the Settlement Class. Smitherman Decl. ¶ 17.
12 This result is in line with far larger data breach settlements, and meets the requirements for class
13 action settlements. *Id.* ¶ 20; *In re Anthem, Inc. Data Breach Litig.*, 327 F.R.D. 299, 321 (N.D. Cal.
14 2018) (granting final approval of data breach settlement where “[o]nly about 1.8% of the
15 Settlement Class Members have submitted claims”); *id.* (noting that the claims rate “in the *In re*
16 *Home Depot* and *In re Target* data-breach actions”—in which final approval was granted in both
17 actions—were “0.2% and 0.23%” respectively); *In re Yahoo! Inc. Customer Data Security Breach*
18 *Litig.*, 2020 WL 4212811, at *34 (N.D. Cal. July 22, 2020) (granting final approval of data breach
19 settlement with “only a 0.3% claims rate”); *Fox v. Iowa Health System*, Case No. 3:18-cv-00327-
20 JDP, ECF No. 101, at ¶ 28 (W.D. Wis. Dec. 3, 2020), *final approval granted*, 2021 WL 826741
21 (W.D. Wisc. Mar. 4, 2021) (12,028 claims out of 1.4 million class members in data breach action,
22 or a 0.86% claims rate). And, despite the success of the notice program, no objections have been
23 filed and only a single class member has opted out. *See* Smitherman Decl. ¶¶ 18-19. Undoubtedly,
24 the notice plan here constitutes the “best notice that is practicable under the circumstances.” Fed.
25 R. Civ. P. 23(c)(2)(B).

26 Due to the success of the notice program, Class Members who submitted timely and valid
27 claims will be able to partake in the Settlement, which carries a \$4.5 million value (exclusive of
28

1 requested attorneys' fees and costs). Declaration of Yitzchak Kopel ("Kopel Decl."), ¶ 9. Pursuant
2 to the Settlement Agreement, Class Members (1) can recoup up to \$200 in documented out-of-
3 pocket expenses, with an aggregate cap of \$250,000, (2) receive reimbursement for up to three
4 hours of undocumented lost time, payable at \$15 per hour (for a total of \$45), that is not subject to
5 the \$250,000 aggregate cap, and (3) can sign up for a free year of "Identity Guard Total powered
6 by IBM Watson" advanced credit monitoring (which includes, among other things, a policy of up to
7 \$1 million reimbursement insurance from AIG covering losses due to identify theft and stolen funds),
8 an aggregate retail value of over \$3.5 million. *Id.* This relief is comparable to much larger data
9 breach settlements.

10 This Court has already preliminarily held that the Settlement is "fair, reasonable, and
11 adequate" and approved the Notice Plan. Order Preliminarily Approving Class Action Settlement,
12 ECF No. 44, at ¶¶ 6, 10. Now that it is plain that the Settlement Agreement and the Notice Plan
13 were a success, the Court should certify the Settlement Class and grant final approval of the
14 Settlement.

15 **II. BACKGROUND AND PROCEDURAL POSTURE**

16 On March 16, 2020, Plaintiffs filed this case in this Court, alleging that Defendant Golden
17 Entertainment (NV), Inc. ("Golden") (collectively with Plaintiffs, the "Parties") was negligent in
18 its handling of the personal identification information ("PII") of its consumers, current and former
19 employees, and vendors, which allegedly led to a data breach in May 30, 2019. ECF No. 1. From
20 the outset of the case, the Parties engaged in direct communications, and as part of their obligations
21 under Fed. R. Civ. P. 26, discussed the prospect of early resolution. Indeed, the Parties agreed to
22 four requests to extend Golden's deadline to respond to the Complaint so as to give the Parties
23 sufficient time to negotiate a settlement. *See* ECF Nos. 10, 12, 17, 19.

24 After three months of negotiations, it appeared as though the Parties had reached an
25 impasse. On June 18, 2020, Golden filed its Motion to Dismiss. ECF No. 21. Plaintiffs responded
26 on July 2, 2020 by filing the First Amended Complaint, which bolstered the original Complaint's
27 allegations and added claims for negligent representation and breach of contract. ECF No. 24.
28

1 These filings prompted the Parties to renew their settlement negotiations. Kopel Decl. ¶¶ 4-6. On
2 August 13, 2020, the Parties notified the Court that they had reached a “settlement in principle”
3 and were in the “process of memorializing their agreement.” ECF No. 30. As discussed above,
4 this Settlement was reached over the course of five months of substantial arm’s-length
5 negotiations. Kopel Decl. ¶ 7.

6 Plaintiffs filed their Motion for Preliminary Approval of Class Action Settlement on
7 October 12, 2020. ECF No. 34. The Court held a hearing on December 2, 2020, and granted
8 preliminary approval on December 17, 2020. ECF No. 44. The Court’s preliminary approval
9 order approved the proposed Notice Plan and directed the parties and the Claims Administrator to
10 provide notice pursuant to the entered schedule. As discussed herein, the Notice Plan has been
11 fully executed and has been a tremendous success.

12 Plaintiffs have filed their Motion for an Award of Attorneys’ Fees, Costs and Expenses, and
13 Service Awards for the Class Representatives concurrently with this motion. The motion is set for
14 hearing on May 12, 2021, concurrently with the Final Approval hearing.

15 **III. THE STANDARD FOR FINAL APPROVAL OF CLASS ACTION SETTLEMENTS**

16 “The claims, issues, or defenses of a certified class may be settled ... only with the court’s
17 approval.” Fed. R. Civ. P. 23(e). The Court may finally approve a class settlement “only after a
18 hearing and on finding that it is fair, reasonable, and adequate.” Fed. R. Civ. P. 23(e)(2); *Officers*
19 *for Justice v. Civil Serv. Comm’n of City & Cty. of San Francisco*, 688 F.2d 615, 625 (9th Cir.
20 1982). To assess whether a proposed settlement comports with Rule 23(e), a district court “may
21 consider some or all” of the following factors: (1) the strength of plaintiff’s case; (2) the risk,
22 expense, complexity, and likely duration of further litigation; (3) the risk of maintaining class
23 action status throughout the trial; (4) the amount offered in settlement; (5) the extent of discovery
24 completed, and the stage of the proceedings; (6) the experience and views of counsel; (7) the
25 presence of a governmental participant; and (8) the reaction of the class members to the proposed
26 settlement. *Rodriguez v. West Publishing Corp.*, 563 F.3d 948, 963 (9th Cir. 2009); *see also*
27
28

1 *Hanlon v. Chrysler Corp.*, 150 F.3d 1011, 1026 (9th Cir. 1998). No single factor is the “most
2 significant.” *Officers for Justice*, 688 F.2d at 625.

3 In addition, “[a]dequate notice is critical to court approval of a class settlement under Rule
4 23(e).” *Hanlon*, 150 F.3d at 1025.

5 **IV. THE COURT SHOULD CERTIFY THE SETTLEMENT CLASS**

6 The Ninth Circuit has recognized that certifying a settlement class to resolve consumer
7 lawsuits is a common occurrence. *Hanlon*, 150 F.3d at 1019; *see also La Caria v. Northstar*
8 *Location Services, LLC*, 2021 WL 94477, at *3 (D. Nev. Jan. 11, 2021) (“When presented with a
9 proposed settlement, a court must first determine whether the proposed settlement class satisfies
10 the requirements for class certification under Rule 23.”). In assessing those class certification
11 requirements, a court may properly consider that there will be no trial. *Amchem Prods., Inc. v.*
12 *Windsor*, 521 U.S. 591, 620 (1997) (“Confronted with a request for settlement-only class
13 certification, a district court need not inquire whether the case, if tried, would present intractable
14 management problems ... for the proposal is that there be no trial.”).

15 In its Order Preliminarily Approving Class Action Settlement, the Court certified the
16 following class for settlement purposes:

17 [A]ll customers, vendors, and current and former employees of Golden to
18 whom Golden mailed notice that between May 30, 2019, and October 6,
19 2019, Golden was the target of a cyberattack in which third parties sent
20 phishing emails to Golden’s employees in the hopes of gaining access to
21 Golden’s computer systems and might have resulted in unauthorized
22 parties accessing personal information. The Settlement Class specifically
23 excludes: (i) Golden and its respective officers and directors; (ii) all
24 Settlement Class Members who timely opt-out of the settlement; (iii) the
25 judge assigned to evaluate the fairness of this settlement; and (iv) any
26 other person found by a court of competent jurisdiction to be guilty under
27 criminal law of initiating, causing, aiding, or abetting the criminal activity
28 occurrence of the Phishing Attack or who pleads nolo contendere to any
such charge.

24 ECF No. 44, at ¶ 4. The Court found that “(a) the Settlement Class certified herein numbers at
25 least in the tens of thousands of persons, and joinder of all such persons would be impracticable;
26 (b) there are questions of law and fact that are common to the Settlement Class, and those questions
27 of law and fact common to the Settlement Class predominate over any questions affecting any
28

1 individual Settlement Class Member; (c) the claims of the plaintiffs are typical of the claims of the
2 Settlement Class they seek to represent for purposes of settlement; (d) a class action on behalf of
3 the Settlement Class is superior to other available means of adjudicating this dispute; and (e) as set
4 forth below, plaintiffs and their counsel are adequate representatives of the Settlement Class.” *Id.*

5 ¶ 3. Notably, no objections have challenged that conclusion. The Court may rely on the same
6 rationale as explained in its Order to find that class certification is appropriate under Fed. R. Civ. P.
7 23(a) and (b) in connection with final approval. *See In re Netflix Privacy Litig.*, 2013 WL
8 1120801, at *3 (N.D. Cal. Mar. 18, 2013) (“Because the Objections do not appear to raise a viable
9 challenge to th[e] conclusion [that certification of a settlement class is appropriate], the Court will
10 rely on the rationale for class certification as explained in the Preliminary Approval Order.”).

11 **V. THE SETTLEMENT NOTICE PROGRAM HAS BEEN COMPLETED AND THE**
12 **CLASS MEMBER RESPONSE HAS BEEN POSITIVE**

13 In its December 17, 2020 Order, after an evaluation of the Settlement Agreement’s
14 proposed Notice Plan, the Court found “the form, content, and method of disseminating notice to
15 the Class” comply with Fed. R. Civ. P. 23(c)(2), Fed. R. Civ. P. 23(e), 28 U.S.C. § 1715, and the
16 Due Process Clause of the United States Constitution because “they are the best practicable means
17 of notice under the circumstances, and are reasonably calculated, under all the circumstances, to
18 apprise the members of the Class of the pendency of the Action, the terms of the Settlement, and
19 their right to object to the Settlement or exclude themselves from the Class.” ECF No. 44 ¶ 10(c).
20 “The Court further [found] that all of the notices are written in simple terminology, are readily
21 understandable by Class Members, and comply with the Federal Judicial Center’s illustrative class
22 action notices.” *Id.*

23 Each of the Settlement’s Notice provisions was implemented as set out in the Settlement
24 and instructed by the Court. The Settlement Administrator received 155 timely filed Claims to date
25 and is currently reviewing the validity of those claims. Smitherman Decl. ¶ 20.

26 The Notice Plan has been a success. To start, every Class member for whom Defendant
27 had contact information received direct notice via mail. Smitherman Decl. ¶¶ 5-6. Further, any
28 Class Members whose addresses had changed received forwarded mail notice. In addition, as

1 required by the December 17, 2020 Order, the notice administrator (1) timely established and
2 began operating the Settlement Website and Toll-Free Telephone Number by January 18, 2021; (2)
3 timely uploaded the Settlement Agreement, the Class Action Complaint, the First Amended Class
4 Action Complaint, the Order Preliminarily Approving Class Action Settlement, and (3) and timely
5 uploaded the Claim Form (and allowed Class Members to files claims through the website).
6 Smitherman Decl. ¶¶ 9-13.

7 The notice administrator estimates that the notice program delivered an approximate 93%
8 reach. Smitherman Decl. ¶ 17. The 93% reach is the hallmark of a great notice program, and
9 certainly within the range of approval. *See, e.g., In re Online DVD-Rental Antitrust Litig.*, 779
10 F.3d 934, 945-46 (9th Cir. 2015) (affirming approval of notice plan based on rental records using
11 both regular mail and email); *Wilson v. Airborne, Inc.*, 2008 WL 3854963, at * 4 (C.D. Cal., Aug.
12 13, 2008) (approving program reaching 80% of Class Members); *Federal Judicial Center Judges’*
13 *Class Action Notice and Claims Process Checklist*, [www.fjc.gov/public/pdf.nsf/lookup/](http://www.fjc.gov/public/pdf.nsf/lookup/NotCheck.pdf/$file/NotCheck.pdf)
14 [NotCheck.pdf/\\$file/NotCheck.pdf](http://www.fjc.gov/public/pdf.nsf/lookup/NotCheck.pdf/$file/NotCheck.pdf) (“A high reach, e.g. between 70-95% can often reasonably be
15 reached by a notice campaign”); *In re Toyota Motor Corp. Unintended Acceleration Mktg., Sales*
16 *Prac., and Prod. Liab. Litig.*, 2012 WL 7802852, at *8 n.13 (C.D. Cal. Dec. 28, 2012) (“Notice
17 need not actually reach every single class member; instead, the notice need only be ‘reasonably
18 calculated, under all the circumstances, to apprise interested parties of the pendency of the action
19 and afford them an opportunity to present their objections.’”) (quoting *Silber v. Mabon*, 18 F.3d
20 1449, 1454 (9th Cir. 1994)). Despite this impressive reach, to date, not a single person has
21 objected to any part of the Settlement.

22 **VI. THE SETTLEMENT AGREEMENT IS FAIR, ADEQUATE, AND REASONABLE**

23 **A. The Settlement Was The Product Of Serious, Informed** 24 **Litigation And Non-Collusive Negotiations**

25 There is no question that the Settlement was arrived at through genuine arm’s-length
26 bargaining after a developed factual record that allowed the parties to have a “clear view of the
27 strengths and weaknesses of their case[.]” *Retta v. Millennium Prods., Inc.*, 2017 WL 5479637, at
28 *6 (C.D. Cal. Aug. 22, 2017). Accordingly, it is entitled to a presumption of reasonableness. *City*

1 *P'ship Co. v. Atl. Acquisition Ltd. P'ship*, 100 F.3d 1041, 1043 (1st Cir. 1996) (“When sufficient
2 discovery has been provided and the parties have bargained at arm’s-length, there is a presumption
3 in favor of the settlement.”); *see also Rodriguez*, 563 F. 3d at 965 (“We put a good deal of stock in
4 the product of an arm’s-length, non-collusive, negotiated resolution.”); *Lee v. Enterprise Leasing*
5 *Co.-West*, 2015 WL 2345540, at *5 (D. Nev. May 15, 2015) (“Considering the favorable terms of
6 the settlement, the Court has no reason to doubt class counsel’s representation that the Parties’
7 settlement negotiations were in good faith, at arms’-length and were in no way collusive.”).

8 As discussed above, and in Plaintiffs’ motion seeking preliminary approval, the Settlement
9 is the result of arm’s-length negotiations that began at the onset of this case and spanned many
10 months. The Parties notified the Court of a settlement-in-principle on August 13, 2020, five
11 months after the filing of the case. *Kopel Decl.* ¶ 7. The prolonged settlement negotiations
12 allowed the Parties to analyze the respective strengths and weaknesses of their respective positions.
13 *Kopel Decl.* ¶¶ 11-15. Thus, “Class Counsel did not negotiate the Settlement Agreement in a
14 vacuum, but were able to fully consider the strengths and weaknesses of Plaintiffs’ claims.” *Retta*,
15 2017 WL 5479637, at *6. “Accordingly, this factor weighs in favor of granting final approval.”
16 *Id.*

17 **B. Strength Of Plaintiffs’ Case**

18 In determining the likelihood of a plaintiff’s success on the merits of a class action, “the
19 district court’s determination is nothing more than an amalgam of delicate balancing, gross
20 approximations and rough justice.” *Officers for Justice*, 688 F.2d at 625 (internal quotations
21 omitted). The court may “presume that through negotiation, the Parties, counsel, and mediator
22 arrived at a reasonable range of settlement by considering Plaintiff’s likelihood of recovery.”
23 *Garner v. State Farm. Mut. Auto. Ins. Co.*, 2010 WL 1687832, at *9 (N.D. Cal. Apr. 22, 2010)
24 (citing *Rodriguez*, 563 F.3d at 965). Here, the settlement negotiations were hard-fought and
25 negotiated over five months, with both parties and their counsel thoroughly familiar with the
26 applicable facts, legal theories, and defenses on both sides. Plaintiffs believe that the Settlement is
27 an outstanding result considering the issues addressed below.
28

1 Data breach cases like this one are particularly complex and risky. *Fox v. Iowa Health*
2 *System*, 2021 WL 826741, at *5 (W.D. Wisc. Mar. 4, 2021) (“Data breach litigation is evolving;
3 there is no guarantee of the ultimate result.”); *Gordon v. Chipotle Mexican Grill, Inc.*, 2019 WL
4 6972701, at *1 (D. Colo. Dec. 16, 2019) (“Data breach cases such as the instant case are
5 particularly risky, expensive, and complex.”); *In re Sonic Corp. Customer Data Sec. Breach Litig.*,
6 2019 WL 3773737, at *7 (N.D. Ohio Aug. 12, 2019) (“Data breach litigation is complex and
7 risky.”). Those risks are exacerbated at class certification due to the “dearth of precedent” on non-
8 settlement data breach classes. *In re Anthem, Inc. Data Breach Litig.*, 327 F.R.D. 299, 318 (N.D.
9 Cal. 2018). Indeed, as far as Class Counsel knows, only one non-settlement data-breach class has
10 been certified under Fed. R. Civ. P. 23(b)(3) to date. *Id.* (citing *Smith v. Triad of Ala., LLC*, 2017
11 WL 1044692, at *16 (M.D. Ala. Mar. 17, 2017)). “Moreover, multiple federal courts around the
12 country had denied bids to certify classes in data-breach cases.” *In re Anthem, Inc. Data Breach*
13 *Litig.*, 2018 WL 3960068, at *12 (N.D. Cal. Aug. 17, 2018).

14 In particular, Plaintiffs would also face the very high risk that they could not present a
15 damages model at trial. *In re Anthem, Inc. Data Breach Litig.*, 327 F.R.D. at 318 (“The Court
16 further notes that trying the case may have presented certain manageability problems with regard to
17 the calculation of individual damages under some of the proposed damages theories.”); *In re*
18 *Yahoo! Inc. Customer Data Security Breach Litig.*, 2020 WL 4212811, at *9 (N.D. Cal. July 22,
19 2020) (“Yahoo contested whether Plaintiffs could determine on a class-wide basis ... the value of
20 any Personal Information provided to Yahoo, and whether the Data Breaches caused a decrease in
21 that value.”). Even in certifying a non-settlement data breach class, the *Smith* court noted “[t]he
22 Named Plaintiffs claim myriad [] different expenses, costs, fees, penalties, lost opportunities, loss
23 of time, mileage costs, lost wages, professional fees, general frustration, and other inconveniences.
24 Resolving these claims for damages will require a series of proceedings in which each class
25 member can put on his or her case for damages.” *Smith v. Triad of Ala., LLC*, 2017 WL 1044692,
26 at *14 (M.D. Ala. Mar. 17, 2017).

1 Golden vigorously denies Plaintiffs’ allegations and assert that neither Plaintiffs nor the
2 Class suffered any harm or damages. In addition, Golden would no doubt present a robust defense
3 at trial, and there is no assurance that the Class would prevail – or even if they did, that they would
4 be able to obtain an award of damages significantly higher than achieved here absent such risks.
5 *Fox*, 2021 WL 826741, at *5 (“Data breach litigation is evolving; there is no guarantee of the
6 ultimate result.”). Thus, in the eyes of Class Counsel, the proposed Settlement provides the Class
7 with an outstanding opportunity to obtain significant relief at this stage in the litigation. The
8 Settlement also abrogates the risks that might prevent Class Members from obtaining *any* relief.

9 **C. The Settlement Provides Exceptional Relief For The Class**

10 The considerations offered by the Settlement Agreement provide extraordinary results for
11 the Class. Class Members were permitted to claim (i) up to \$200 in documented out-of-pocket
12 expenses incurred as a result of the Phishing Attack, with an aggregate cap of \$250,000, (ii) up to
13 three hours of undocumented lost time, payable at \$15 per hour (for a total of \$45), that is not
14 subject to the \$250,000 aggregate cap, and (iii) a free year of “Identity Guard Total powered by
15 IBM Watson” advanced credit monitoring—which includes, among other things, a policy of up to
16 \$1 million reimbursement insurance from AIG covering losses due to identify theft and stolen
17 funds—an aggregate retail value of over \$3.5 million. Considering the significant risks of non-
18 payment Class Members would have faced had this case proceeded, the Settlement Agreement
19 provides tremendous relief.

20 The \$4,545,735 settlement value (exclusive of attorneys’ fees and costs) and individual
21 relief per Class Member are also outstanding in comparison to other, larger data breach cases¹:

22 //

23 //

24 //

25 //

26
27 ¹ The below-referenced settlement have been attached as Exhibits 5-8 to the Declaration of
28 Yitzchak Kopel In Support Of Motion For Preliminary Approval (ECF No. 34).

Case	Size	Out-Of Pocket Reimbursement	Lost Time Reimbursement	Credit Monitoring
<i>Miranda v. Golden Entertainment (NV), Inc.</i> , Case No. 2:20-cv-00534 (D. Nev.)	17,683	Up to \$200 documented per class member, capped at \$250,000 in aggregate	Up to three hours, \$15 per hour (total of \$45), undocumented, not subject to aggregate cap	One free year of “Identity Guard Total powered by IBM Watson” credit monitoring, including a \$1 million AIG insurance policy for losses from data breach
<i>Johansson-Dohrmann v. CBR Systems, Inc.</i> , Case No. 3:12-cv-01115 (S.D. Cal.)	~292,000	Aggregate cap of \$500,000 for all documented out of pocket expenses, \$200 cap per class member for cost of obtaining credit monitoring	\$10 per hour, no hour cap, documented, subject to \$500,000 aggregate cap	Two free years of ProtectMyID Alert credit monitoring
<i>Smith v. ComplyRight, Inc.</i> , Case No. 1:18-cv-04990 (N.D. Ill.)	~663,000	Estimated \$50 cash payment per class member from \$3.025 million fund, no documentation required	Estimated \$50 cash payment from \$3.025 million fund, no documentation required	Two free years of MyIDCare credit monitoring
<i>Bray v. Gamestop Corp.</i> , Case No. 1:17-cv-01365 (D. Del.)	~1.3 million	Up to \$235 per class member in documented out-of-pocket expenses, no aggregate cap	Up to three hours of documented lost time per class member, compensable at \$15 per hour (total of \$45)	None
<i>In re LinkedIn User Privacy Litig.</i> , Case No. 5:12-cv-03088 (N.D. Cal.)	~6.5 million	Maximum payment of \$50 from \$1.25 million common fund, no documentation	Maximum payment of \$50 from \$1.25 million common fund, no documentation	None

As the above chart makes clear, Class Members in this case can be compensated for lost time and out-of-pocket expenses at roughly the same level as class members in much larger data breaches. Further, unlike class members in *CBR Systems* and *Gamestop*, Class Members here do not need documentation to recover lost time. Finally, unlike class members in *Gamestop* and

1 *LinkedIn*, Class Members here can receive a free year of advanced credit monitoring with \$1
2 million in insurance to protect against identity theft.

3 **D. The Risk Of Continuing Litigation And Maintaining Class**
4 **Action Status**

5 As referenced above, proceeding in this litigation in the absence of settlement poses various
6 risks such as failing to certify a class, having summary judgment granted against Plaintiffs, or
7 losing at trial. Such considerations have been found to weigh heavily in favor of settlement. *See*
8 *Rodriguez*, 563 F.3d at 966; *Curtis-Bauer v. Morgan Stanley & Co., Inc.*, 2008 WL 4667090, at *4
9 (N.D. Cal. Oct. 22, 2008) (“Settlement avoids the complexity, delay, risk and expense of
10 continuing with the litigation and will produce a prompt, certain, and substantial recovery for the
11 Plaintiff class.”); *Lee*, 2015 WL 2345540, at *5 (“Because denial of the motion for final approval
12 of settlement could cause significant further litigation, and appeals that could disturb the Court’s
13 findings, this factor weighs in favor of approving the settlement.”). These risks are exacerbated in
14 a data breach case such as this one. *Fox*, 2021 WL 826741, at *5 (“Data breach litigation is
15 evolving; there is no guarantee of the ultimate result.”); *Gordon*, 2019 WL 6972701, at *1 (“Data
16 breach cases such as the instant case are particularly risky, expensive, and complex.”); *In re Sonic*
17 *Corp. Customer Data Sec. Breach Litig.*, 2019 WL 3773737, at *7 (“Data breach litigation is
18 complex and risky.”).

19 Plaintiffs would also face the risk of establishing liability at trial in light of conflicting
20 expert testimony between their own expert witnesses and Golden’s expert witnesses. In this “battle
21 of experts,” it is virtually impossible to predict with any certainty which testimony would be
22 credited, and ultimately, which expert version would be accepted by the jury. The experience of
23 Class Counsel has taught them that these considerations can make the ultimate outcome of a trial
24 highly uncertain. Moreover, even if Plaintiffs prevailed at trial, in light of the possible damage
25 theories that could be presented by both sides, there is a substantial likelihood based on the above
26 analysis that Class Members may be awarded significantly less than is offered to them under this
27 Settlement on an individual basis. By settling, Plaintiffs and the Class avoid these risks, as well as
28 the delays and risks of the appellate process.

E. The Response Of Class Members Has Been Universally Positive

22

Despite an expansive notice program that reached 93% of Class Members, only a single class member opted out of the settlement and not a single class member objected. Smitherman Decl. ¶¶ 17-19. Such an overwhelmingly positive response from Class Members supports final approval. *See, e.g., Nat'l Rural Telecomm. Coop. v. DIRECTV, Inc.*, 221 F.R.D. 523, 529 (C.D. Cal. 2004) (“The absence of a single objection to the Proposed Settlement provides further support for final approval of the Proposed Settlement. It is established that the absence of a large number of objections to a proposed class action settlement raises a strong presumption that the terms of a proposed class settlement action are favorable to the class members.”). Further, the claims rate here—0.87%—is in line with, or even superior to, other data breach cases. Smitherman Decl. ¶ 20; *In re Anthem, Inc. Data Breach Litig.*, 327 F.R.D. at 321 (granting final approval of data breach settlement where “[o]nly about 1.8% of the Settlement Class Members have submitted claims”); *id.* (noting that the claims rate “in the *In re Home Depot* and *In re Target* data-breach actions”—in which final approval was granted in both actions—were “0.2% and 0.23%” respectively); *In re Yahoo! Inc. Customer Data Security Breach Litig.*, 2020 WL 4212811, at *34 (granting final approval of data breach settlement with “only a 0.3% claims rate”); *Fox v. Iowa Health System*, Case No. 3:18-cv-00327-JDP, ECF No. 101, at ¶ 28 (W.D. Wis. Dec. 3, 2020), *final approval granted*, 2021 WL 826741 (12,028 claims out of 1.4 million class members in data breach action, or a 0.86% claims rate); *see also In re Sonic Corp. Customer Data Sec. Breach Litig.*, 2019 WL 3773737, at *10 (“The claims rate was lower than hoped, but it is unclear that any alternative notice method could have improved the claim rate. Counsel should not be penalized for a low claims rate in cases where claims are inherently less likely to be made.”).

F. The View Of Experienced Counsel Support Approving This Settlement

23
24
25
26
27
28

“The recommendations of plaintiffs’ counsel should be given a presumption of reasonableness.” *In re Omnivision Techs., Inc.*, 559 F. Supp. 2d 1036, 1043 (N.D. Cal. 2008). Deference to Class Counsel’s evaluation of the Settlement is appropriate because “[p]arties represented by competent counsel are better positioned than courts to produce a settlement that

1 fairly reflects each party’s expected outcome in litigation.” *Rodriguez*, 563 F.3d at 967. Here, the
2 Settlement was negotiated by counsel with extensive experience in consumer class action litigation.
3 Based on their experience, Class Counsel concluded that the Settlement provides exceptional
4 results for the class while sparing the class from the uncertainties of continued and protracted
5 litigation. *Harris v. U.S. Physical Therapy, Inc.*, 2012 WL 6900931, at *9 (D. Nev. Dec. 26, 2012)
6 (“Based on counsels’ knowledge of the specific facts of this action, experience in settlements such
7 as this, and opinion that the settlement is fair, reasonable, and adequate, the court finds that this
8 factor weighs in favor of granting final approval of the settlement.”).

9 For all the foregoing reasons, the Settlement is fair, adequate, and reasonable, and should be
10 preliminarily approved.

11 **VII. CONCLUSION**

12 For the foregoing reasons, Plaintiffs respectfully request that the Court grant final approval
13 to the Settlement Agreement, certify the Settlement Class, and enter the Final Approval Order in
14 the form submitted herewith.
